Datum 15. April 2016 (2016-04-15\_biaj\_altersrenten-zugang-bestand-zahlbetrag-2000-2014.pdf)

### **BIAJ-Materialien**

#### **Altersrenten: Rentenzugänge, Rentenbestand und Rentenzahlbeträge 2000 bis 2014**

Der Anlass für diese BIAJ-Materialien war insbesondere die am 12. April 2016 veröffentlichte „sensatio-  
nelle“ WDR-Projektion zur Altersarmut 2030: „Fast jedem zweiten droht die Altersarmut“ – „25,1 Millionen  
sind von Altersarmut bedroht“.<sup>1</sup> Die WDR-„Berechnung“ für die gesamte erwerbsfähige Bevölkerung im  
Alter von 15 bis unter 65 Jahren beruht auf einer Hochrechnung der Zahl der gesetzlichen Renten (Ren-  
ten nach SGB IV) wegen Alters unterhalb des Grundsicherungsniveaus. Der vom WDR erweckte „gut  
gemeinte“ Eindruck, 46,7 Prozent der Erwerbsbevölkerung (25,1 Millionen von 53,7 Millionen) sei 2030  
von Altersarmut bedroht (beim WDR: sogar unterhalb des Grundsicherungsniveaus<sup>2</sup>), ist irreführend.

Wenn der WDR die Ausgangslage in 2014 dargestellt hätte, wäre aufgefallen: Das Ausmaß der Armuts-  
gefährdung aller Menschen im Alter von 65 Jahren und älter lässt sich nicht eins zu eins aus den gesetz-  
lichen Renten wegen Alters ableiten.<sup>3</sup> 2014 lag der Rentenzahlbetrag bei 10,90 Millionen Renten wegen  
Alters unterhalb der Armutsgefährdungsschwelle (917 Euro), bei 8,488 Millionen Renten unterhalb von  
750 Euro. Die auf Grundlage der amtlichen Sozialberichterstattung für 2014 ermittelte Zahl der armutsge-  
fährdeten Menschen im Alter von 65 Jahren und älter betrug 2,44 Millionen. Und die die Altersarmut  
deutlich unterzeichnende Zahl der Menschen, die Grundsicherung bezogen, betrug 515.289. Dass Men-  
schen auch ohne oder mit einer geringen gesetzlichen Rente wegen Alters nicht arm oder sogar reich  
sein können, bleibt in der WDR-Projektion unbeachtet. Kurz: Mit der „Erklärung“ von nahezu der Hälfte  
der Bevölkerung als armutsgefährdet wird der Blick auf die wachsende Zahl der wirklich armen Menschen  
verstellt – und damit wohl auch auf die notwendigen gesetzlichen Veränderungen für diese Menschen. ■

**Rentenzugänge:** Im Jahr 2014 sind in der gesetzlichen Rentenversicherung insgesamt 823.631 Renten  
nach SGB VI wegen Alters (hier kurz: Renten wegen Alters) zugegangen. Die nach Rentenzahlbetrag  
differenzierte Betrachtung zeigt unter anderem: Bei 52,22 Prozent (430.134) dieser Rentenzugänge lag  
der monatliche Rentenzahlbetrag in 2014 unter 750 Euro. (vgl. Tabellen 1 und 2, Seite 3 und 4)

Differenziert nach Geschlecht stellt sich der Blick auf diese 823.631 Renten wegen Alters in 2014 wie  
folgt dar: Bei den insgesamt 408.879 Rentenzugängen für Männer lag der monatliche Rentenzahlbetrag  
in 2014 in 33,18 Prozent (135.647) der Fälle unter 750 Euro. Bei den insgesamt 414.752 Rentenzu-  
gängen für Frauen lag der monatliche Rentenzahlbetrag in 2014 in 71,00 Prozent (294.487) der Fälle  
unter 750 Euro. (vgl. Tabellen 3 bis 6, Seite 5 bis 8)<sup>4</sup> ■

**Rentenbestand:** Bei 47,55 Prozent (8,489 Millionen) der insgesamt 17,852 Millionen Renten wegen  
Alters lag der Rentenzahlbetrag 2014 unter 750 Euro. Beim Rentenbestand der Männer lag der Renten-

<sup>1</sup> siehe dazu die Mitteilung des Büro für absurde Statistik (BaSta) vom 12. April 2016: <http://biaj.de/buero-fuer-absurde-statistik/756-wdr-53-7-millionen-rentnerinnen-und-rentner-in-2030-wie-und-wo.html>

<sup>2</sup> Das Grundsicherungsniveau liegt insbesondere bei Ein-Personen-Haushalten noch unterhalb der Armutsgefährdungsschwelle in der amtlichen Sozialberichterstattung: siehe Seite 2 unten

<sup>3</sup> siehe dazu: [http://www.deutsche-rentenversicherung.de/Allgemein/de/Inhalt/0\\_Home/meldungen/2016\\_04\\_12\\_stellungnahme\\_wdr\\_altersarmut.html](http://www.deutsche-rentenversicherung.de/Allgemein/de/Inhalt/0_Home/meldungen/2016_04_12_stellungnahme_wdr_altersarmut.html)

<sup>4</sup> In den **Tabellen 1 bis 6** ist dargestellt, wie sich die Verteilung der jährlichen Zugänge der Renten wegen Alters auf die Rentenzahlbeträge in den Jahren 2000 bis 2014 (nicht preisbereinigt) entwickelt hat

zahlbetrag bei 26,32 Prozent (2,092 Millionen) der insgesamt 7,947 Millionen Männer-Renten unter 750 Euro, beim Rentenbestand der Frauen bei 64,59 Prozent (6,397 Millionen) der insgesamt 9,905 Millionen Frauen-Renten. (vgl. Tabellen 9 bis 12, Seiten 11 bis 14)<sup>5</sup>

Rechnerisch lagen **2014** insgesamt 61,0 Prozent (10,90 Millionen) der Renten wegen Alters unter der Armutsgefährdungsschwelle von 917 Euro. (Nettoäquivalenzeinkommen Einpersonenhaushalt) Bei den Männern waren es 35,8 Prozent (2,85 Millionen), bei den Frauen 81,3 Prozent (8,05 Millionen) der Renten wegen Alters im Bestand (2014). Zum Vergleich: **2005** lagen 50,7 Prozent (8,59 Millionen) der Renten wegen Alters unter der Armutsgefährdungsschwelle von 736 Euro (2005). Bei den Männern waren es 25,0 Prozent (1,88 Millionen), bei den Frauen 71,0 Prozent (6,71 Millionen) der Renten wegen Alters im Bestand (2005).

Für **2014** wurden von IT.NRW auf Basis der Ergebnisse des Mikrozensus folgende Armutsgefährdungsquoten in der Altersgruppe 65 Jahre und älter errechnet: 14,4 Prozent (insgesamt), 12,3 Prozent (Männer), 16,1 Prozent (Frauen). Die Armutsgefährdungsquoten in der Altersgruppe 65 Jahre und älter im Jahr **2005**: 11,0 Prozent (insgesamt), 8,7 Prozent (Männer), 12,7 Prozent (Frauen).<sup>6</sup>

In absoluten Zahlen ergeben sich daraus für das Jahr **2014** rechnerisch: etwa 2,44 Millionen armutsgefährdete Menschen im Alter von 65 Jahren und älter, 0,90 Millionen Männer und 1,55 Millionen Frauen. **2005**: 1,72 Millionen, 0,56 Millionen Männer und 1,17 Millionen Frauen.<sup>7</sup>

**Ein rechnerischer Vergleich der Zahl der armutsgefährdeten Menschen im Alter 65 Jahren und älter mit der Zahl der Renten wegen Alters unter der Armutsgefährdungsschwelle<sup>8</sup> zeigt:**

In 2014 galten bei insgesamt 10,90 Millionen Renten wegen Alters unter der Armutsgefährdungsschwelle (gemäß amtlicher Sozialberichterstattung) insgesamt 2,44 Millionen Menschen im Alter von 65 Jahren und älter als armutsgefährdet. Neun Jahre zuvor, im Jahr 2005, galten bei insgesamt 8,59 Millionen Renten wegen Alters unter der Armutsgefährdungsschwelle insgesamt 1,72 Millionen Menschen als armutsgefährdet.

**Der entsprechende, nach Geschlecht differenzierte Vergleich stellt sich wie folgt dar:**

In **2014** galten bei 2,85 Millionen **Männer**-Renten wegen Alters unter der Armutsgefährdungsschwelle insgesamt 0,90 Millionen Männer im Alter von 65 Jahren und älter als armutsgefährdet. Neun Jahre zuvor, im Jahr **2005**, waren bei 1,88 Millionen Männer-Renten wegen Alters unter der Armutsschwelle insgesamt 0,56 Millionen Männer im Alter von 65 Jahren und älter als armutsgefährdet.

In **2014** galten bei 8,05 Millionen **Frauen**-Renten wegen Alters unter der Armutsgefährdungsschwelle insgesamt 1,55 Millionen Frauen im Alter von 65 Jahren und älter als armutsgefährdet. Neun Jahre zuvor, im Jahr **2005**, galten bei 6,71 Millionen Frauen-Renten wegen Alters unter der Armutsgefährdungsschwelle insgesamt 1,17 Millionen Frauen im Alter von 65 Jahren und älter als armutsgefährdet. ■

**Ergänzend: Ende 2005** bezogen 342.855 Menschen **Grundsicherungsleistungen im Alter** (65 Jahre und älter), 110.166 Männer und 232.689 Frauen. **Ende 2014** bezogen 515.289 Menschen Grundsicherungsleistungen im Alter (65 Jahre und älter), 201.312 Männer und 313.977 Frauen. Die Zahl dieser Grundsicherungsleistungen im Alter unterzeichnet die tatsächliche Altersarmut insbesondere aus zwei Gründen: a) die Dunkelziffer - arme Menschen, die ihren Anspruch nicht durch einen entsprechenden Antrag geltend machen wollen oder können, b) das insbesondere bei Ein-Personen-Haushalten deutlich unter der Armutsgefährdungsschwelle liegende Grundsicherungsniveau. ■

Tabellen 1 bis 12

<sup>5</sup> In den **Tabellen 7 bis 12** ist dargestellt, wie sich die Verteilung des Bestandes der Renten wegen Alters auf die Rentenzahlbeträge in den Jahren 2000 bis 2014 (nicht preisbereinigt) entwickelt hat.

<sup>6</sup> Amtliche Sozialberichterstattung: <http://www.amtliche-sozialberichterstattung.de/>

<sup>7</sup> kleinere Rundungsdifferenzen bei Addition der Männer und Frauen zu insgesamt

<sup>8</sup> Rechnerisch nicht berücksichtigt wird bei dem folgenden Vergleich, dass ein Teil der Renten wegen Alters im Bestand Renten im Alter von unter 65 Jahren sind. Unbeachtet bleibt bei diesem Vergleich auch, dass insbesondere unter den niedrigen Renten ein nicht unerheblicher Teil der Renten wegen Alters an Rentnerinnen und Rentner ausgezahlt wird, die nicht mehr in der Bundesrepublik Deutschland leben.

## Renten nach SGB VI wegen Alters: Rentenzugänge nach Höhe des Rentenzahlbetrags im Jahr des Rentenzugangs: Bundesrepublik Deutschland
